

# SEALING EDGES FOR BELT CONVEYORS

**SPILL-EX<sup>®</sup>** Sealing Edges are characterized by their technical design and high quality components; they have the following advantages:

- Simple and quick assembly on all conveyors.
- Perfect sealing thanks to precise adjustments on belts running on rollers or slider bars.
- Significant wear potential, 60 mm for type HD and 40 mm for type LP.
- Cuts the maintenance costs associated with the conveyor and its environment.

## **OTHER ADVANTAGES**

- Easy assembly by welding or bolting in the smallest spaces.
- Metal parts treated against corrosion.
- Clamping stirrups allowing the stability of the settings and preventing any pushing of the seal outwards.
- Flexible rubber blocks, robust and independent of each other.

## **OPTIONS**

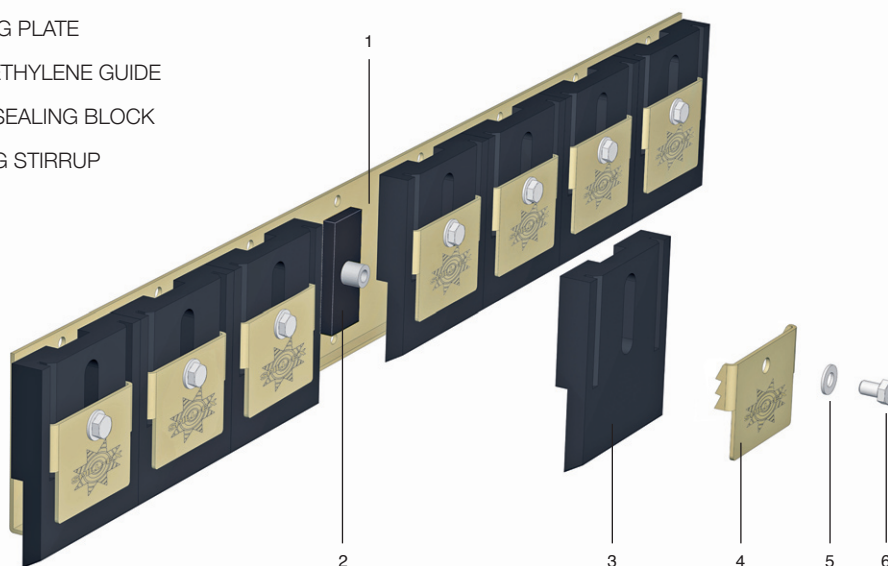

- Made entirely of 304 or 316 stainless steel.
- Rubber blocks resistant to greasy products.
- Rubber blocks resistant to a temperature of 150°.
- Flame-resistant and antistatic rubber blocks.
- White non-food rubber blocks.

# SEALING EDGES

- 1) MOUNTING PLATE
- 2) HD POLYETHYLENE GUIDE
- 3) RUBBER SEALING BLOCK
- 4) CLAMPING STIRRUP
- 5) WASHER
- 6) BOLT

**HDS - LPS**

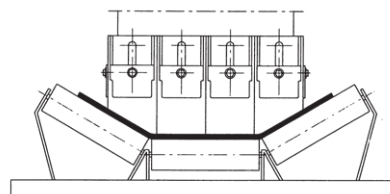

## SIDE SEALING EDGES

**HDS** For Heavy Duty Handlings  
WD 1200 mm - 8 blocks 150 x 200 - 30/20 mm

**LPS** For Light or Medium Handling  
WD 1000 mm - 8 blocks 125 x 150 - 25/15 mm

**HDR - LPR**

## REAR SEALING EDGES

**HDR** For Heavy Duty Handlings  
WD 1200 mm - 8 blocks 150 x 300 - 30 mm

**LPR** For Light or Medium Handling  
WD 1000 mm - 8 blocks 125 x 250 - 25 mm  
(in polyurethane)
